

Bilateral coset structure $\Gamma_{M_{19}}^* = K_L \pi_0 = \pi_0 K_R$

Separate ambient stabilizer: $\text{Stab}_{S_9}(w_9^l) \cong S_3 \times S_6$ (order 4320)

$K_L, K_R \not\subseteq \text{Stab}_{S_9}(w_9^l)$; separate from the coset

External conjugator $\pi_0 = (1, 5, 3, 9, 6, 8, 7, 4, 2) \in S_9$, $\pi_0 \notin K_L \cup K_R$, $K_L \cap K_R = \{e\}$ (trivial)
